

DIGITIZING YOUR
OPERATIONAL QUALITY
Your **DIGITAL OPERATIONS** solution is here!
QC, HSE, O&M all under one roof

A Suite of Solutions to cover all your operational needs

Show off your projects, features, or clients in this section.

Quality Control & Assurance Software

Manage all of your quality operations from a single software. Nestrom provides the ability to manage audits, inspections, corrective & preventive actions and much more. You will be able to deploy tablets or mobile devices to the field directly to capture data in real-time and act on it properly.

Operations & Maintenance Software

Organize maintenance tickets, schedule recurring checkups and run your workflow to manage your O&M. Nestrom provides you with all the needed features to get the job done, and empowering your field teams with a mobile solution that makes it easy to execute tasks and report back.

Health, Safety & Environment Software

Ensure that all of your operations are adhering to your health, safety and environment regulations. Conduct audits and inspections as well as report findings that need to be addressed. Follow through with the action taken to rectify the non-conformity and ensure all is on track.
